Office Action Summary	Application No. 10/824,192	Applicant(s) RUDE, EDWARD	
	Examiner Chuck Mah	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: "*reinforcing rib*" and "*tail portion*" as stated in the claims are not clearly defined in the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, and 9-14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by applicant's admitted prior art (AAPA figures 1-2). Prior art has a means (7, 9) for preventing the stiffer (5) moving away from the edge. "even if said shaft is at

Art Unit: 3677

least partially retracted from within said spring portion opening” is a conditional statement.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over AAPA in view of Dube (6,098,921).

AAPA discloses the invention as claimed including a tab-slot engagement to retain the stiffer in place. AAPA however does not show the tab having a hook.

'821 teaches a tab-slot engagement having a hook-shape tab to prevent a backward motion of the tab in the slot. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the tab of AAPA with a hook to engage the slot as taught by '821 in order prevent a backward motion of the tab in the slot. Note that the tab-slot engagement requires a sliding motion. The sliding movement meets the “unaligned condition” and the “aligned condition”.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
